Product Code: SVB20
20mm Hose Tap Vacuum
Breaker

Material: LEAD FREE DZR Brass

Max Temp: 60°C
Max Pressure: 1400 KPA

Pack Size: 20

Warranty: 12 Months

- **NZBC Clause G12 Water Supplies:** This clause mandates that potable water supplies must be protected from contamination. Backflow prevention devices, including hose tap vacuum breakers, are essential to achieve this.
- **Acceptable Solution G12/AS1:** This document provides specific details on how to comply with Clause G12. It explicitly states that "hose taps connected to the potable water supply system require backflow protection, and the minimum acceptable type of backflow prevention device is a **permanently attached hose connection vacuum breaker.**" The breakaway screw-pin makes this possible.
