

# ThermaSmart PRO

The no-compromise insulation solution

## Extremely robust material

While still relatively flexible, ThermaSmart PRO insulation is exceptionally robust due to its **high tensile and elongational strength**.

## UV resistance

The saturated molecular structure of ThermaSmart PRO structure guarantees a **better UV resistance**, ensuring a more **sustainable performance**.

## Anti-crack material

Protect your copper and brass connections with ThermaSmart PRO, the **anti-crack material**.

## Excellent fire resistance

With a **BL, s1, d0** fire rating, ThermaSmart PRO demonstrates excellent fire and smoke characteristics in respect to building health and safety.

## Integrated vapor barrier

For cooling and refrigeration applications, the **integrated vapor barrier** and **low water absorption** of ThermaSmart

## Fully certified insulation system

Because credibility comes with evidence, we provide ThermaSmart PRO certificates, performance declarations, white papers and data sheets.
